PROFILE INFO

I have **3 years** experience in programming. Self-education is constantly part of my routine.

I practiced with the latest cutting edge development tools. I prefer working in a team as it gives the opportunity to share experience. Able to provide flexible approach of solving work problems, because one right solution is never exist.

WORK EXPERIENCE

Hivex

Outstaff company   **12.2022 - now**

Automation of fintech public services.

The technology stack used by me: **React, TypeScript, Next.js, SSR, GQL, Storybook, Jest, Antd** and **ESLint + Prettier**

On this project I:

- Worked on 'Documents' microservice. Automation workflow with documents.
- Took part at architecture build process
- Wrote Jest tests for components
- Participated of code review
- Implemented the logic of deleting, creating a document.

GetWin

Product company   **04.2022 - 12.2022 (9m)**

CRM system for accounting for IT workers' time, tasks, and productivity.

The technology stack used by me: **React, React hooks, Redux, Redux-thunk, axios, Webpack, SASS**, and **ESLint + Prettier**.

On this project I:

- Worked with endpoints for frontend and backend interaction (**REST API**)
- Connected the mail service for communication within the CRM and with other mailboxes
- Built a calendar to schedule tasks with notifications, time allocation, and categories using the latest Date-fns libraries
- Implemented the functionality of sections: basket, archive, change log

Global Marketing Group

Outsource company   **04.2021 - 02.2023 (1y 11m)**

- Used Rest API for the layout of financial sites
- A website was created based on layouts of various topics, for example: finance, education, online store, travel booking.
- Built website based on layouts from Figma

Hot Sales

Outsource company   **09.2020 - 02.2021 (6m)**
